

a component of capacitor and coil - capacitance and inductance combined

You must save (space), we offer the solution!

The space saving variant for your circuit board!
We supply the L-C combination fitted to yours conditions. By combining the single components of capacitor and coil we offer a compact design. Take advantage of a placement process for two components.

advantages:

1. save space on the printed circuit board
2. possibility of automatic assembly out of the carrier tape
3. reduction of storage and transport costs
4. prefabricated component combination from a single source

contact and distribution:

ARNOLD ELEKTRONIK GmbH
Gottfried-Schenker-Straße 14
09244 Lichtenau / Germany
phone.: +49 (0) 37208 88 99 00
fax: +49 (0) 37208 88 99 06
E-Mail: info@arnold-elektronik.de
