

RoHS information for FROLYT aluminum electrolytic capacitors

To the present and best of our knowledge and based on the information provided to us by our suppliers, we hereby inform you that our products defined as „RoHS-compatible“ comply with the requirements of the amended RoHS directive 2015/863/EU. Our products also meet the requirements of the Regulation restricting the use of hazardous substances in electrical and electronic equipment and thus the transformation of the directive into national law.

Frolyt capacitors do not contain any of the following substances above the maximum concentration limit of 0.1% for Pb, Hg, Cr (VI), PBB, PBDE, DEHP, BBP, DBP, DIBP, and 0.01% for Cd.
